Iko te pai o ta tatou whakawhitiwhiti korero, ehara i te mea ko te pai o te korero engari ko te pai o te mohio ki a tatou.

How well we communicate is not determined by how well we say things but how well we are understood.

This TA101 will cover and discuss the official TA concepts in combination with Te Ao Māori world view.

The TA101 concepts offer insights into understanding yourself and others in a 2-day professional development course.

- Transactional Analysis is one of the most accessible theories of modern psychology that examines a person's relationships and interactions.
- Analysis (TA) is a powerful set of tools that can have an enormous impact on your personal and professional interactions, communication, relationships and life.
- TA is an approach that has both depth and breadth. It is not a "quick fix" and will always stand you in good stead whatever your situation.
- TA is a theory of human development, personality and communication and its more than just that – it can help us understand ourselves more, gain insights and increase self-awareness and help us bring about change.

Attendees will receive the official TA101 Certificate that is internationally acknowledged and is accredited as continuing coach education (CCE) with the International Coaching Federation (ICF).
